

How to enroll to MEDICAL BIOTECHNOLOGY Federico II University of Naples

All **non-EU citizens living abroad**, wishing to apply for the admission to a degree course at the University of Napoli "Federico II", have to register on the [Universitaly platform](https://www.universitaly.it/index.php/) (<https://www.universitaly.it/index.php/>) that enables them to both apply to the University and to request a visa for study purposes.

To speed up the process, students can send their pre-enrollment documents at the email admissionbiotechnology@unina.it. A dedicated commission will check the candidates' eligibility before the registration on the Universitaly platform.

The Universitaly portal allows you to pre-enroll in the degree course. It also gives you information on tuition fees to enroll in universities and any scholarships.

The pre-enrollment procedure is mainly divided into two steps:

- the registration on the platform in order to create a personal account.
- the application for admission to a degree course at the University of Napoli "Federico II".

The University shall evaluate all requests and the eligible applicants shall be "provisionally admitted" upon their arrival in Napoli, when it will be necessary to hand in their original school and/or academic qualifications as proof of authenticity.

The deadline to apply for pre-evaluation on Universitaly web site is **JUNE 21**.

Follow the instructions on the site and you won't go wrong. Once you have pre-enrolled, we should receive your request directly from the master degree secretariat.
